Last Updated Wednesday, 09 July 2008

How to make your home eco friendly or environmentally sound, many new products and materials are now being developed that will enable many home owners to create and decorate their home with eco friendly roller blinds, blinds, shutters or curtains. Green Roller Blinds, Eco friendly window coverings, natural plantation shutters, all with natural materials, will ensure in the future that all homes pass strict environmental guidelines to ensure that maximum heat retention and minimal heat loss is achieved.

Current developments in curtain lining will allow you to have a full blackout lining on your window that is 100% cotton treated fibre, roller blinds and blinds are utilising material that is made from 100% hemp or recycled paper. Full plantation shutters are widely used now creating a heat efficient window covering. How to ensure eco friendly window coverings are as efficient as roller blinds or curtains.

Trying to convert your home window coverings into eco friendly or environmentally sound products has always been a challenge. Now with blinds, roller blinds and plantation shutters all being manufactured from natural products and sustainable materials, it has become more accessible for home owners.
